STAMPEDE AT RIBSTONE PROVES A SUCCESS

The stampede held at Ribstone on Monday August 2nd was attended by a good number of people.

From the start to the finish things were kept going. Among the attractions were bucking horse riding, steer riding, calf roping, stake race, and basketball. We are informed of the following prize winners, other names were not available...

Saddle Contest: E. Russel, W. Greenwood, Buck Hooper.

Prize for best bucking horse was won by Corkscrew Bell owned by J. McMann.

Mr. Greenwood suffered a fractured bone when a horse stepped on his face. Later a collection of over \$40 was taken up for him. From last reports we hear that he is progressing favorably.

On account of the fact that some of the Ribstonians were riding, judges for the bucking horse contest were obtained from outside; Joe Lamb and Jim Strayer filling this position.

In the riding events money was given to all making a qualified ride.

There were some pretty rough horses and steers present and possibly, after their ride, quite a few sick cowboys.

Calf Roping was won by Joe Lamb, his time being 8 seconds.

The stake race was won by Andy Train on Pinto (McCorkills).

Arlie was victor in the basketball game in which they clashed with Ribstone.

PELICAN BRIEFS

A large party of Ribstone and local folks spent Sunday at the Battle River and held an enjoyable time. This has got to be quite a summer resort.

The grain yield has been greatly reduced by the intense heat.

Hear you are leaving town Scotty. Not afraid of skunks we hope.

Weary Willie in negro flesh passed thru here Wednesday and dined at Hall's. Seemed like Dixieland come north.

Ernest Birvall, Sidesup P.O. pioneer, now of B.C., stopped here Monday en route to Montreal for England where he has been called by the serious illness of his mother.

Dan Eddletons employee met with a painful accident Sunday evening when his saddle horse became frightened at Adolph Hall's coach. The horse had to be shot.

Pete Wallgren's palace is progressing favorably. We understand Pete contemplates full

(Continued on page 8)

LIST OF PRIZE WINNERS AT CHAUVIN AGRICULTURAL FAIR

The weather on fair day was excellent, with TH TH TH TH TH TH very soberly bothered by heat and flies. It was pleasing to note that the number of entries in general were larger than last year, which seems to point to a better fair yet next year. The interest mainly centred around the horses, of which there was a good exhibition. The cattle also showed up well, but the pigs and sheep were noticeably absent.

There was a fine showing of vegetables though many gardens have received considerable damage from cut worms this year.

The Domestic exhibits were not so large as last year, but were of a high standard.

The exhibits in the Ladies work were excellent, to repeat the words of the judge, "Your Ladies work here is always very good".

In the childrens department some excellent work was exhibited both in needlework and Domestic Science classes.

A tent of exhibits from the Sewing Department showed some excellent work was exhibited both in needlework and Domestic Science classes.

There were some pretty rough horses and steers present and possibly, after their ride, quite a few sick cowboys.

Calf Roping was won by Joe Lamb, his time being 8 seconds.

The stake race was won by Andy Train on Pinto (McCorkills).

Arlie was victor in the basketball game in which they clashed with Ribstone.

Team in Harness; S. Sewell; A. Goulette.

AGRICULTURAL

Brood Mare, foal at foot: 1st E. B. Lang, 2nd Alex Taylor, 3rd J. A. Semple.

Dry Mare or Gelding, 1st L. A. Cayford, 2nd A. Goulette, 3rd MacCluskey.

Filly or Gelding 1st J. A. Semple, 2nd E. B. Lang

Foal of 1926: 1st E. B. Lang, 2nd J. A. Semple, 3rd Alex Taylor.

Team in Harness, 1st A. Goulette, 2nd L. A. Cayford, 3rd Alex Clifford.

GENERAL PURPOSE

Mare or Gelding in halter 1st L. Fahner, 2nd A. MacSparran, 3rd Dr. Folkins.

Brood Mare, with foal 1st Dr. Folkins, 2nd Lee Bros.

Filly or Gelding, 1st J. A. Semple.

Foal of 1926, 1st Dr. Folkins, 2nd Dr. Folkins, 3rd Lee Bros.

Team in Harness, 1st J. A. Semple, 2nd L. A. Cayford, 3rd Dr. Folkins.

DRIVING CLASS

Driving Single, 1st Clifford 2nd George Newstead.

Brood Mare, foal at foot, 1st J. A. Semple, 2nd George Watson, 3rd Dr. Folkins.

SADDLE

Horse over 14.2, 1st Walter Robinson, 2nd Donald Folkins, 3rd L. A. Cayford.

Horse 14.2 or under, 1st Harold Burton, 2nd L. Fahner, 3rd Mrs. Gibb.

SPECIAL PRIZES

Bank of Montreal, Dr. Folkins, Gordon Cunningham; 1st E. A. Pitman,

Wainwright Creamery; 1st Mrs. Rodden, 2nd Mrs. Rodden, 3rd L. Fahner.

Union Bank, 1st J. Russell.

GET OF BULL COMPETITION

Beef Class; 1st J. Russell, 2nd A. Pitman, 3rd Mrs. Rodden.

4th Dr. H. G. Folkins, 5th R. Beatty, 6th J. A. Semple.

PAIF-FED CALF COMPETITION

Dairy Calf; 1st Mae MacSparran, 2nd John Couchesne, 3rd Kenneth Perry, 4th Harold Perry.

Beef Calf; 1st Ralph Watson,

2nd John Couchesne; 3rd John Semple; 4th Wm. Semple; 5th Ed. MacSparran.

STOCK JUDGING COMPETITION

1st Milford Russel, 2nd Edwin Ryall; 3rd Roger Pick, 4th Ezra Fahner, 5th Jean MacSparran.

POINTS MADE IN JUDGING CONTEST

Bull 1 year old and over; 1st J. Russell.

Bull Calf; 1st J. Russel; 2nd J. Russell.

Bull Championship; J. Russell.

Cow 3 years old or over; 1st J. Russell.

Dry Mare or Gelding 3 years or over; J. A. Semple; A. Goulette;

A. Goulette.

Filly or Gelding, 2 years or over J. A. Semple.

Filly or Gelding, 1 year old; J. A. Semple.

Foal of 1926; E. B. Lang.

Heifer 1 year, 1st E. Pitman.

Heifer 2 years 2nd E. Pitman.

Heifer 1 year, 1st E. Pitman.

Female Championship, E. Pitman.

GRADE CATTLE

Cow 3 years in milk, J. A. Semple, 2nd in milk, 1st J. A. Semple, 3rd Clyde Bingham.

Heifer, 2 years 2nd A. MacSparran.

Heifer 1 year, 1st R. Beatty, 2nd E. Pitman, 3rd J. A. Semple.

Calf, 1st J. Russel; 2nd J. Russel, 3rd J. A. Semple; 3rd Edwin MacSparran.

DAIRY

Cow 3 years or over 1st Mrs. Rodden, 2nd Mrs. Rodden, 3rd L. Fahner, 4th A. MacSparran.

5th H. L. Bingham.

Heifer 1 year, 1st A. MacSparran, 2nd A. MacSparran, 3rd H. L. Bingham.

Heifer Calf, 1st Dr. Folkins, 2nd Mae MacSparran, 3rd J. A. Semple.

FAT

Steer, 2 years old 1st J. Russel, 2nd J. Russel.

Steer 1 year, 1st J. Russel, 2nd J. Russel.

Steer 1 year old 1st J. Russel.

Steer 1 year old 1st J. Russel.

DUAL PURPOSE

Cow, 3 years, 1st Dr. Folkins;

2nd P. H. Perry, 3rd J. A. Semple, 4th J. A. Semple.

SPECIAL PRIZES

Bank of Montreal, Dr. Folkins, Gordon Cunningham; 1st E. A. Pitman,

Wainwright Creamery; 1st Mrs. Rodden, 2nd Mrs. Rodden, 3rd L. Fahner.

Union Bank, 1st J. Russel.

GET OF BULL COMPETITION

Beef Class; 1st J. Russel, 2nd A. Pitman, 3rd Mrs. Rodden.

4th Dr. H. G. Folkins, 5th R. Beatty, 6th J. A. Semple.

"The Covered Wagon"

(Continued from last week)

"An' any time now the main band may come. Git ready, men. Fer me, I must git back to my train. They may be a mile, or thirty. Woud any man want to ride with me? Woud ye Sam Woodhull?"

The eyes of his associates rested on Sam of Woodhull.

"I think one man would be safer than two," said he. "My own place is here if there's use to be a fight."

"Mebbe so," assented Jackson. "In fact, I don't know a more'n one'd git through if you an' me both started." His cold gray eye was fixed on Woodhull carelessly. "An' of hit was the wrong man got through he'd never lead them Missouri men fer'rerd to where this fight'll be."

"An' hit'll be right here. Look yan!" he added.

He nodded to the westward, where a great dust cloud arose,

"More is comin'," said he. "Yan's Bannack's like as not, even the Shoshones, all I know though they're usul quiet. The rumors is out between all the tribes. I must be on my way."

He hurried to find his own horse looked to its welfare, for it, too, had an arrow wound. As he passed a certain wagon he heard a voice call to him, saw a hand at the curtained front.

"Miss Molly! Hit's you! Ye're not dead no ways, then?"

"Come," said the girl.

He drew near, fell back at the sight of her thin face, her pallor, but again she commanded him.

"I know," said she. "He's safe?"

"Yes, Miss Molly, a lot safer'n any of us here."

"You're going back to him?"

"Yes. When he knows ye're hurt he'll come. Nothin'll stop him, onset I tell him."

"Wait!" she whispered. "I heard you talk. Take him this. She pushed into his hand a folded paper, unsealed, without address. "To him!" she said, and fell back on the blankets of her rude pallet. At that moment her mother was approaching, and at her side, walked Woodhull, actuated by his own suspicions about Jackson. He saw the transaction of the passed note and guessed what he could not know. He tapped Jackson on the shoulder, drew him aside, his own face pale with anger.

"I'm one of the officers of this train," said he. "I want to know what's in that note. We have no truck with Banion, and you know that. Give it to me."

Jackson calmly tucked the paper into the fire bag that hung at his belt.

"Come an' take it, Sam, damn ye!" said he. "I don't know what's in hit, an' I don't know. Who it's to ain't none o' yore damn business!"

"You're a cursed meddler!" broke out Woodhull. "You're a spy in our camp, that's all you are!"

"So! Well cussed meddler er not, I'm a cussed shore shot. An' I advise ye to give over on all this an' mind yore business. Ye'll have plenty to do by midnight, an' by that time all yore women an' children, all yore old men an' all yore cowards'll be prayin' fer Banion an' his men to come. That there includes you homewhere's Sam. Dan't temp' me too much ner too long. I'll kill ye if ye do! Go on away!"

They parted, each with eyes over shoulder. Their talk had been aside and none had heard it in full. But when Woodhull again joined Mrs. Wingate, that lady conveyed to him Molly's refusal to see him or to set a time for seeing him. Bitterly angered, humiliat'd to the core, he turned back to the men who were completing the defenses of the wagon park.

"I kain't start now afore dark," said Jackson to the train command. "They're a-goin' to jump the train. When they do come they'll surround ye an' try to keep ye back from the water till the stock goes crazy. Lay low and don't let a Injun inside. Hit may be a hull day, er more, but when Banion's men come they'll come a-runnin'—allowin' I git through to tell 'em."

"Dig in a trench all the way around," he added finally. "Put the women an' children in it and pile up all yer flour on top. Don't waste no powder—let 'em come up close as they will. Hold on until we come."

At dusk he slipped away, the splash of his horse's feet in the ford coming fainter and fainter, even as the hearts of some fainter at his wise and sturdy counsel left them. Naught to do but wait.

They did wait—the women and children, the old and the ill and the wounded huddled shivering and crying in the scoured-out sand, hardest and coldest of beds; the men in line against the barricade, a circle of guards outside the wagon park. But midnight passed and the cold hours of dawn, and still no sign came of an attack. Men began to believe the dust cloud of yesterday no more than a false alarm, and the leaders were of two minds, whether to take Jackson's counsel and wait for the Missourian, or to hook up and push on as fast as possible to Bridger's fort, scarce more than two hard days' journey on ahead. But before this breakfast-hour decision had gone far events took the decision out of their hands.

"Look!" cried a voice. "Open the gate!"

The cattle guards and outposts who had just driven the herd to water were now spurring for shelter and hurrying on the loose stock ahead of them. And now, from the willow growth above them, from the trail that led to the ford and from the more open country to the westward there came, in three great detachments not a band or a body, but an army of the savage tribesmen, converging steadily upon the wagon train.

They came slowly, not in a wild charge, not yelling, but chanting. The upper and right hand bodies were Crows. Their faces painted black, for war and revenge. The band on the left were wild men on active, half-broke horses, their weapons for the most part

(Continued on page 7)

Teacher: "What do we use soap for?"
Pupil: "That's what I'd like to know."

* * *

Fruit stains can usually be removed from fast-colored silks by sponging them with cold soapy water. —Tin-Bits.

SOIL SURVEYS PROGRESS

The soil surveys being made under the joint auspices of the Provincial Department of Agriculture and the University of Alberta are progressing, the present survey being under way in the territory west of youngstown. This is the third year in which soil surveys have been conducted.

MENTION OUR ADVERTISEMENTS

ANNUAL POW-WOW OF JASPER SQUADRON OF TRAIL RIDERS AT BEAUTIFUL MALIGNE LAKE

NEARLY all of Canada and several states as well as far away India and the British Isles were represented at the first annual pow-wow of the Jasper Squadron of Trail Riders of the Canadian Rockies on July 21st, held in the heart of the Rockies, 100 miles west of Jasper, 35 miles from the nearest settlement. Around the big camp fire, built so close to the shore of Maligne Lake, was its first meeting with the snow-time reflections of the great mountain peaks which surround this finest of all Rocky Mountain lakes, gathered the riders who made the trail trip.

The pow-wow was called to order by Major Fred Brewster, commander of the squadron, and vice-president of the main body, and by a unanimous vote the following state of affairs was selected for 1926-27: Commander, Major Fred Brewster; secretary-treasurer, H. S. Davis; mileage committee, R. W. Langford, Digby Hart, T. W. Dornan, and Donald C. Phillips. A decision was reached to hold the next annual pow-wow in the Tongue River Valley, beside Amethyst Lake, at the foot of the "Ram-

parts," where the Canadian Alpine Club is holding its annual meeting this month.

Numbering more than 100 members, here the Jasper Squadron represents almost every country in the world, including on its roll such personages as the Earl and Countess of Huntingdon, the Duke and Duchess of Kent, the Prince and Princess of all Japanese Alpinists; Hachio Moto, son of the Premier of Japan; Sir Henry Thornton, president of the Canadian National Railways; Sir George Munro, and a Farrel Macdonald, of movie fame.

Those in attendance at Maligne Lake were: Miss M. E. Nickell, Toronto; Miss C. R. Nickell, Miss Rosalie Eacubert, Brooklyn; Mr. W. H. Jones, New York City; Mr. Henry F. Foster, Toronto; Mr. J. C. Macmillan, Mrs. Albert Scott, Galesburg, Ill.; Professor H. W. Sheldon, Edmonton; George H. Browne, Minneapolis; Professor E. V. C. Thompson, Edinburgh; Mr. J. C. Osborne, Osborne Scott, general passenger agent, Canadian National Railway, Winnipeg; Ray Peck and Arthur Carter, Ottawa; W. H. Robinson and G. H. Lash, Montreal; Joe Har-

ris, Boston; A. Wilkins, Guildford, England; Professor Neave and Allan Mosley, Winnipeg; John Collected, Madeline Island, Wis.; Major Fred Brewster, H. S. Davis, Digby Harris, Bob Jones, Charles Bowlin, Dean Swift, Harry Meller, John Toovey and Grant Hare, Jasper.

The top picture shows Maligne Lake; a glacial glacial and nestling among the Opal Hills with snow-capped mountains in the background. The Trail Riders in the foreground from left to right are Ray Peck, Miss Hazel Reid, Osborne Scott, Miss M. E. Nickell, H. S. Davis, Miss C. R. Nickell, Henry C. Fowler and Mr. Jones.

Lower left: Alpine Riders at the summit of Sheep Pass, at an elevation of 9,000 feet.

Lower right: Miss Rosalie Eacubert, of 692 Fulton Street, Brooklyn, who climbed to the top of Mount Assin, 9,300 feet, in the Jasper National Park, on day of the Trail Riders' Pow-Wow and by so doing achieved the distinction of being the first woman to ascend that peak.

NO SALE FOR UNFINISHED
BEEF CATTLE

Edmonton August 5th—Stamped by the tumbling cattle market, farmers are rushing unfinished stock into Edmonton so rapidly that the local market is flooded, causing very little trading and sending the weakening prices still lower.

Thursday's receipts at the Edmonton stock yards totalled 1,003 cattle, 199 calves, 851 hogs and 182 sheep. All these figures are away over the average, the unusual cattle receipts totalling around 150 a day. Together with 762 head of cattle held over from Wednesday's trading, the market

-- Of Interest To Farmers --

was absolutely dead.

United States and Eastern buyers can not find a market for unfinished cattle just now. Even cattle of the better grades are finding difficulty to sell at draggy prices.

"You remind me of the wild sea waves."

Oh-h-h, because I'm so restless and unconquered!"

"No. Because you make me sick."

SILOS - ESSENTIAL
FARM EQUIPMENT

By J. G. Haney, Agri. Extn
Dept. International Harv. Co.

At the present time there is perhaps no farm improvement being considered by more farmers, than the silo. It is also true that the subject of silos and silage is one which to many seems complicated and vague. In many instances in the Northwest, there are good reasons for the consideration of this really important farm improvement.

It is realized that there must be a change from the strictly one-crop system to a more diversified one. That such a change from is necessary, there are few who will not admit.

The three-year average of wheat without the effect of crop rotation on the L.H.C. Farm, was 11 bushels per acre. After the rotation became effective, the seven-year average was 24 bushels, and four of these years averaged nearly 30 bushels. If grain farming is to be made profitable, it will be because crops are rotated, moisture and fertility conserved, which means that more stock must be kept on the farms. Where stock is kept, the farming is carried on with less difficulty because of the fact that the work is more evenly distributed throughout the year, and the proper condition of the soil is more easily maintained.

When the silo is considered, it will generally mean that corn or some other cultivated crop, will be grown for the purpose of filling the silo, which will be a means of destroying weeds and conserving moisture without summer-fallowing. That such a practice is valuable is proven by the fact that old fields, planted to corn and given good cultivation, when put back into wheat will often nearly double their former yield. Many farmers resort to summer fallow to secure this same benefit. Growing a crop of corn accomplishes the same results as summer fallowing, and the corn, when intelligently used, is a profitable crop.

A silo full of corn, and alfalfa or sweet clover hay in the barn, will make it possible to keep a bunch of live stock on every farm and return to the soil a good portion of the fertility removed, as well as active organic matter which will further aid in maintaining the productiveness of the soil.

The silo stands for
Conservation

The present era will be considered one of unprecedented agricultural progress. During the past fifty years practically all of our farm machinery has been developed and brought into use. Everywhere we are hearing the talk of conservation. The government is making every effort to conserve our natural forests, water powers, coal, petroleum, etc.

With the farmer, the question must not be alone how much he can raise, but also how much he can get out of what he does raise and how much of this he can re-

(Continued on page 6)

SEED SELECTION
BY THE FARMER

The term "seed selection" necessarily includes a choice of variety as well as the selection of seed of that variety. Every farmer should ask himself these two questions: Am I growing the best variety? Am I using the best possible seed of that variety?

Some varieties are more suitable for certain districts than others; will return greater yields; will produce a quality of crop which will demand a better market; or will be more suitable for feeding requirements. It pays to solicit the advice of the nearest experimental station, agricultural college or agricultural agent regarding the varieties which are likely to give best results and then to test out a few of these beside the old sort.

Once a really desirable variety has been located the next important question is how to obtain and maintain a supply of good seed of that variety. It is safe to use only pure seed of high vitality, plump and uniform in quality, free from disease and well matured.

When a change of seed is necessary it should be obtained from

the best source available. Registered seed should be secured if at all possible, as this is the highest grade of seed recognized commercially. If it is desired to improve a variety a simple method is to go through the field at harvest time and select a large number of heads from plants which are strong vigorous, free from disease and uniform in type. It is very important that the selection of identical heads be observed or the resulting crop may not be uniform. These heads may be threshed in a bag, using a round stick, and the seed carefully cleaned and graded with a fanning mill. The seed should be sown on a special plot about one-quarter of an acre on clean land to increase the supply. It has been demonstrated many times that seed produced by this method, with careful and efficient use of a good fanning mill, may pay for the trouble many times over.

A. G. O. WHITESIDE
Cerealist.

A physician records a case of a woman who suffered with persistent asthma until her pet canary died; then the malady disappeared. It is supposed to have been due to the presence of the bird.

"What's economy, Dad?"
"Anything your mother wants to buy."

Here and There

There is no chance of another general strike in Great Britain for a generation and perhaps longer," is the view of Victor Subi, news editor of the Evening News. London, who spent a short vacation in Canada recently. He thought the numbers strike in Great Britain would not be settled before the fall and perhaps not until the winter.

The fishing season opens again August 15 on the Slave Lake and Lake La Biche in Alberta. There are approximately 100,000 pounds of white fish to be shipped during the season from Lake La Biche and over half a million pounds from Lesser Slave Lake as well as a considerable quantity of jackfish and pickerel from both.

Canada's estimated wheat yield as indicated by crop conditions on June 30 is 348,625,000 bushels. The yield estimated to the Prairie Provinces according to the Bureau of Statistics report is \$37,226,000 bushels and for the rest of the Dominion 21,400,000 bushels. Total estimated yield for oats is 458,810,000 bushels and for barley, 100,624,000 bushels. For rye the total estimated yield is 11,762,000 bushels and for flaxseed 8,419,000 bushels.

"A young man wishing to insure himself, was asked: 'Are your parents alive?'

"No, sir; both dead."

"How old was your father when he died?"

"One hundred and five."

"Good gracious! And what was the cause of his death?"

"Fell off his bicycle going to work!"

Packing biscuits at the rate of 32,400 in nine and a half hours, a girl employee of the Shredded Wheat Company has created a record for the firm. Her daily average is sixty a minute.

It is common knowledge Arctic and Antarctic explorers that sea-ice more than a year old is entirely free from salt, although new ice contains the same amount of salt as sea water.

Whereas in the old days Scotsmen emigrated to London, they are now being born there to save the expense of travelling.

The Manitoba Government has commenced an agricultural survey of unoccupied lands in the province which when completed will provide the incoming settler with all available information on such lands. A total of 2,474 homesteads have been taken up in Western Canada this year. All post-war immigration records were broken recently when 1,681 immigrants passed through Winnipeg recently in 48 hours.

The Earl of Glanord, British Under-Secretary for Dominion affairs, and T. Macnaughton, chairman of the overseas committee, are making a tour of Canada to investigate conditions under which the 3,000-family scheme is being handled in this country. They are issuing glowing reports of what they have seen. The full three thousand families will have been brought over here by the end of next year.

A civic vacation party arranged by the Kiwanis Club of Shenandoah, Iowa, recently passed through Toronto and Montreal en route to London, England. There were 600 who availed themselves of the trip and most of these had never travelled outside the United States before in their lives. They will pass through Stratford-on-Avon and Oxford on their way to London and will make a side-trip to Paris and the French battlefields during their stay.

"Association football" in the Dominion of Canada bids fair within the next few years to become a rival to the brand of soccer played by the major leagues in Great Britain," was the comment of Joe Smith, captain of the All-England Association Football team which has just completed its seven-week tour of Canada. The team travelled close on ten thousand miles on its tour and played twenty games against all kinds of teams. They did not lose a single game and scored 105 goals in all with only 18 registered against them.

University men, municipal and government representatives, doctors, priests, notaries, lawyers and newspapermen made up the majority of the party of 100 people who took part in the across-Canada tour of the Université de Montréal prior to the Université de Montréal tour of the University of the West than when they started. The tour was run on C.P.R. lines under the auspices of the University of Montreal, and was the second annual trip that has been made.

CROP REPORT

Augusta 5th 1926

RAILROAD PROVINCES

Alberta: Western Area: Con-
ditions generally continue satis-
factory with the exception that
lack of moisture has reduced the
estimated yields in limited areas.

Northeastern Area: Crops on
well tilled lands are progressing
very satisfactory in spite of the
prolonged drought. Scattered
showers and even good rains re-
cently reported from different
areas will benefit. Prospects re-
main unsatisfactory Chipman to
Vegreville and on the eastern
border of the Province.

Southeastern Area: Weather
conditions continue favourable.
The wheat yield on the best dry
lands is estimated at about 10
bushels per acre. The balance is
poor to bad, but irrigation crops
are good.

Saskatchewan: Northern Area:
Crops continue to suffer from hot
dry weather, and conditions are
unsatisfactory in the centre and
the south, where they yield will
be light. Prospects are materially
better in the north.

Southern Area: Excessive heat
and lack of moisture have caused
damage, and the yield will be
generally light north of C.P.R.

Main line: Conditions are still
fairly satisfactory in the south.

Manitoba: Extreme heat has
been continued with only local
showers, and deterioration has
taken place. Crops are now gen-
erally too far advanced to suffer
serious damage from rust.

Ingersoll watches for harvest-
ing at \$2.00 each at
McKechnie's Drug and Station-

Saker says that the first car-
load of Peaches, Prunes, Pears,
and Plums will be arriving in
Chauvin about August 21st. Be

SILOS - ESSENTIAL
FARM EQUIPMENT

(Continued from page 3)

turn to the soil as working capital, this idea of conserving farm resources has vited the stock and dairy localities of our country with silos, until a recent writer put it, "A good dairy or stock community can be judged by the number of silos on the horizon just as a oil district may be judged by the number of derricks in use."

The silo in the strictest sense of the word is a conservator of farm resources. It has been shown in many experiments that practically 40 per cent of the value of the corn crop is wasted when the stalks are left in the field. It is also known by all who feed corn fodder that there is almost 50 per cent waste in feeding this forage when all the crops grown on the farms are sold, and not the land eventually becomes depleted.

The Silo Essential to the Northwest

There is no region perhaps,

where the silo will prove more valuable than on the northern edge of the Corn Belt. There is no question but that this region will, in the near future, produce a great many more cattle than it ever has. The long winters make it advisable to provide a large amount of feed in convenient form, for carrying the cattle through.

From our experience on the I.H.C. Farms during the past thirteen winters, we are satisfied that the corn crop put in the silo and fed out, will give us from two to four times as much feed as if fed as dry fodder. We also find that a small amount of silage will keep the stock in good shape, and with straw or other coarse roughage, they will come through. For these reasons the silo is essential to the Northwest.

It is really not a question of whether a man with fifteen or twenty head of cattle to winter afford a silo. The facts are that he cannot afford to be without one. There is no question but that within a very few years, the silo will be a part of the farm silos.

improvement on every farm. Many farmers who have had experience with a silo say that they are satisfied that they lost the cost of a silo every year that they did not have one. That is, they have found it essential to grow a cultivated crop, and there is no crop that will take the place of corn in the rotation for this purpose.

It is also true that in order to get the full value out of the corn crop, it must be fed to live stock and that with the silo for putting this corn into, there is enough added profit every year to practically pay for the silo used.

Location of the Silo

There is perhaps no building on the farm that will mean so much to convenience in its location, as the silo. Silage necessarily is heavy to handle, and for this reason provision should be made for as little handling as possible. In this region it is desirable that, if possible the silo should be located where it would have some protection, because of the fact that freezing is more apt to occur in exposed above ground

It is not generally considered advisable to have the silo inside special reason why it should not be. However, in dairy barns the odor from the silage may affect the milk.

Size and Capacity of the Silo

The size of the silo should be determined somewhat by the number of animals that are to be fed from it.

We have found in feeding silage, that 15 to 20 pounds per head per day, with some alfalfa hay and straw, is about all that is necessary to feed stock cattle. Milk cows or fattening steers could be fed more.

During the past twelve winters at the I.H.C. farms, we have fed fifty to eighty head or cattle from trench and pit silos. The silos are filled early in September and we begin feeding silage in November; whenever convenient or necessary we have refilled the silo with dry fodder, adding plenty of water as filled. Silage is fed until the first of June, when the cattle are sold or put on pasture. Our pit silos are 12 feet in diameter and 20 feet deep. With the large number of cattle we found it necessary to refill too often, so built a 12x20 ft 2x6 stave silo on top of the pit silos. We have used this combination silo for eight years, and find no fault with it. We would prefer two pit silos. At Oak Lake, Manitoba, we are using a trench silo that holds 60 to 90 tons of silage. This gives perfect satisfaction, and costs only the work of excavating. The silage is just as good, and a carload of steers are doing just as well, as if fed from a thousand-dollar structure. Have the best silo you can afford, but have a silo.

GRIFFITH UWORRIED
MAKES GREAT COMEDY

With Ample Means at Hand
Proves Himself Master in
New Production

Under new conditions away from the old Mamaronack studios, D. W. Griffith has made his first picture; and it is marked as one of his greatest successes. This great comedy, "Sally of the Sawdust," a United Artists Corporation release, will be at Chauvin on Monday August 16th and at Edgerton on Tuesday the 17th.

In this creation, Griffith has been relieved of the burden of maintaining his great studio solely for his own productions. With ample supply of money and access to the best acting talent is revealed in the splendid cast he has used and in their lavish variety of scenes and costumes.

And never has he made a more entertaining work than is "Sally of the Sawdust." The work is most beautifully dressed of all the Griffith pictures, great sets showing thousands, scenes of beautiful girlhood at its most attractive activities, gorgeous homes, splendid landscapes and throughout an abundance of scenes that indicate an unsparing effort for all that is cheerful, brisk and interesting.

You should not miss this.

Colors can be fixed in print garments by soaking them in an infusion of three gills of salt in a gallon of boiling water. Leave them until cold. Tit-Bits.

The best judges of character are children and dogs.

THE COVERED WAGOS

(Continued from page 2)
bows and arrows. They later found these to be Bannacks, belonging anywhere but here and in any alliance rather than with the Crowe from east of the Pass. Nor did the latter belong here to the south and west, far off their own great hunting range. Obviously what Carson, Bridger, Jackson had said was true. All the emigrants were in league to top the great invasion of the white nation, who were now bringing the women and children and this thing that had buried the buffalo.

They meant extermination now. They were taking their time and would take their revenge for the dead who lay piled before the white man's barricade.

The emigrants rolled back a pair of wagons, and the cattle were crowded through, almost over the human occupants of the along. The gap was closed. All the remaining cargo packages were piled against the wheels, and the noncombatants sheltered in that way. Shovels deepened the trench here or there as men sought better to protect their families.

And now a sudden mêlée of shouts and yells, of tramping hoofs and whirling colors, the bands of the Crowe came charging up in the attempt to carry away their dead of yesterday. Men stooped to grasp a stiffened wrist, a leg, a belt; the ponies squatted under their ghastly dragging burdens.

But this brought them within pistol range. The reports of the white men's weapons began, carefully, methodically, with deadly accuracy. There was no panic. The motionless or the struggling blotches ahead of the

all became quiet, steady, matter-of-fact performance on both sides. This very freedom from action and excitement, so different from the gallant riding of the Sioux, was more terrifying than direct attack en masse, so that when it came to a matter of shaken morale the whites were as easy as their foes, although as bad as a cose as their foes, al-

though thus far they had no casualty at all.

They lacked the one leader,

cool, calm, skilled, experienced

though courage did not lack.

Yet even the best courage suffers

when a man hears the wailing of

his children back of him, the groans of his wife. As the hours

passed with no more than an occasional rifle shot or the zing of an arrow ending its high arc,

the tension on the nerves of the beleaguered began to manifest itself.

At midday the children began

to cry for water. They were ap-

peased with milk from the few cows offering milk; but how long

night that last, with the cattle

themselves beginning to moan

and low?

"How far are they back?"

It was Hall, leader of the Ohio wagons: But none could tell him where the Missouri train had paused. Wingate alone knew why Bannion had not advanced. He doubted if he would come, now,

quarrel between two men," said

Caleb Price to his friend Wingate.

"The other man is a thief, Cale," reiterated Wingate. "He

was court-martialed and broke,

dishonorably discharged from the

Army. He was under Colonel

Doniphan, and had control of

subsistence in upper Mexico for

some time. He had the regimental

funds. Doniphan was irregular

lar. He ran the regiment like a

mess, and might order first this

officer, then that, of the line or

staff, to take on his free-for-all

quartermaster trains. But he was

honest. Bannion was not. He

had him broken. The charges

were filed by Captain Woodhull

Well, is it any wonder there is

no love lost? And is it any won-

der I wouldn't train up with a

thief, or allow him to visit my

family? By God! right now I

didn't send for him to help us!"

"So!" said Caleb Price. "So!

And that was why the wedding

—

"Yes! A foolish fancy of a

girl. I don't know what passed

between her and Bannion. I felt

it safer for my daughter to be

married, as soon as could be, to

another man, an honest man. You

know how that came out. And

now she's as apt to die as live,

and we're all as apt to, you others

send for that renegade to save us!

I have no confidence that he will

come. I hope he will not. I'd

like his rifles, but I don't want

him."

"Well," said Caleb Price, "It

is odd how his rifles depend on

him and not on the other man.

yet they both lived in the same

town."

"Yes, one man may be more

plausible than another."

"Yes? I don't know that I

ever saw a man more plausible

with his fists than Major Bannion

was. Yes, I'll call him plausible.

I wish some of us—say, Sam

Woodhull, now—could be half as

plausible with these Crows. Dif-

ference in men, Jess!" he con-

cluded. "Woodhull was, there-

and now we're sending there for

and now we're sending there for

the other man."

"You want that other man,

thief and dishonest as he is?"

"By God! yes! I want his rifles

and him too. Women and children

and all, the whole of us, will die

if that thief doesn't come inside

of another twenty-four hours."

Wingate flung out his arms,

walked away, hands clasped be-

hind his back. He met Woodhull

"Sam, what shall we do?" he

demanded. "You've sort of in-

charge now. You've been a sol-

ider, and we haven't much of

that."

"There are fifteen hundred or

two thousand of them," said

Woodhull slowly—"a hundred

and fifty of us that can fight. Ten

to one, and they mean no

quarter."

"But what shall we do?"

"What can we do but lie close

and hold the wagons?"

"And wait?"

"Yes."

"Which means the Missouri

men!"

There's no one else. We don't

know that they're alive. We

don't know that they will come."

"But one thing I do know!"

his dark face gathered in a scowl

"If he doesn't come it will not

be because he was not asked!

That fellow carried a letter from

Molly to him. I know that. Well,

what do you all think of me?

What's my standing in all this?

If I've got to be shamed and hu-

miliated, how can a man be?

And what am I to expect?"

"If we get through, if Molly

lives, you mean?"

"Yes. I don't quit what I want.

I'll never give her up. You give

me leave to try again? Things

may change. She may consider

the wrong she's done me, an hon-

est man. It's his hanging around

all the time, keeping in his mind.

And now we've sent for him—

and so has she?"

They walked apart, Wingate

to his wagon.

"How is she?" he asked his

wife, nodding to Molly's wagon.

"Better in some ways, but

low," replied his stout helpmate,

herself haggard, dark circles of

fatigue about her eyes. "She

won't eat, even with the fever

down. If we was back home where we could get things! Jess, what made us start for Oregon?"

"What made us leave Kentucky for Indiana, and Indiana for Illinois? I don't know. God help us now!"

"It's bad, Jesse."

"Yes, it's bad." Suddenly he took his wife's face in his hands and kissed her quietly. "Kiss the Molly for me," he said. "I wish—I wish—"

"I wish them other wagons'd come," said Molly. "Then we'd see."

CHAPTER XXXI

The Fight at the Ford

Jackson, wounded and weary as he was, drove his crippled horse so hard that by dawn he had covered almost fifty miles, and was in sight of the long line of wagons, crawling like a serpent down the slopes west of the South Pass, a cloud of bitter alkali dust hanging like a blanket over them. No part of the way had been more cheerless than this gray, bare expanse or more than a hundred miles, and none afforded less invitation for a bivouac. But both man and horse were welling spent.

Knowing that he would be reached within an hour or so at the best, Jackson used the last energies of his horse in riding back and forth at right angles across the trail, the Plains sign of "Come to me!" He flung it would be seen. Te flung himself down across the road in the dust, his bridle tied to his wrist. His horse now nearly gone, lay down beside him, nor ever rose again. Here in the time a gallop could bring them up, Bannion and three of his men found them, one dead the other little better.

"Bill! Bill!"

The voice of Bannion was anxious as he lightly shook the shoulder of the prone man, half afraid that he, too, had died. Stupid in sleep, the scout sprang up, rifle in hand.

(To Be Continued)

... Has he ever been on Government work before?" the manager asked the friend of the jobseeker.

"Very nearly."

"What do you mean, very nearly?"

"Well you see, there wasn't quite enough evidence to convict him."

* * *

The three hundred wapiti placed in Banff and Jasper National parks, Alberta, a few years ago have now increased to fifteen hundred. In addition to these there are 350 of this otherwise nearly exterminated animal in Buffalo Park, Wainwright, and 220 in Elk Island park.

* * *

"While madam was away there was a caller."

"Did you get the name?" inquired the mistress.

"No, but she knew you."

"Did she tell you so?"

"No, but when I told her that I had been with you for two months she said, 'Is it possible?'

* * *

Farming operations conducted annually in Buffalo National Park at Wainwright, Alberta, are of such proportions as to yield sufficient fodder for the domestic animals there and to provide ample seed, besides permitting substantial shipments to be made to meet similar requirements in other National Parks.

This Season Has Demonstrated

and beyond doubt, that to be a successful farmer, year in and year out, a man has to "know his business". And with farming as with other trades there is always something to be learned.

From week to week we publish "Experimental Farm Notes." These articles appear under different headings and are written by authorities at the various Experimental Farms and Stations.

Beside this we are inserting in this issue the second of a long series of articles prepared by Mr. Haney, a farmer all his life and now in charge of three demonstration stations.

There are other ways, too, in which the Chronicle can be made to pay good dividends, and perhaps the most important of these is by reading the ads. from week to week. By studying these ads. and buying accordingly, often considerable savings can be effected; and a dollar saved is a dollar earned. Then too there are the want ads. and the impoundment notices etc. They are all things that every farmer should read.

Tell your neighbors about the "Chronicle".

Remember—the more subscribers we have the better service we are enabled to give.

To keep potatoes a good color add a few drops of lemon juice to the water in which they are being peeled. —T. Bits.

Blankets from \$2.45 a pair at Saker's

No one need be without a picture story of the family and surroundings. You can get a number 2 Brownie size 2 1/4 x 3 1/4 for \$2.25 or a 2A Brownie size 2 1/2 x 4 1/4 for \$3.75 and either one is guaranteed to take first class pictures. Get one right away and have it for autumn which is the best picture time of the year.

D. W. PARCELS WINNER
OF CHALLENGE CUP

The friends and policyholders of D. W. Parcels District Representative of the Dominion Life Assurance Company will be gratified to learn that "Bill" won the Dominion Agency Challenge Cup May and June, having written a larger volume of business in that period than any other represen-

tative of the Company in the whole of Canada. This was a wonderful feat, especially as it was accomplished in about six weeks.

Mr. Parcels expresses his appreciation to everyone who helped in any way and wishes to assure them of continued service regarding their policies. The wonderful record made, Mr. Parcels states, was only possible because of the excellent service his Company is in a position to offer the public.

We predict that in the very near future, Mr. Parcels will again win this Challenge Cup.

A fine box of chocolates 2 1/2 lbs fancy box. Super value at Saker's \$1.00.
